To Whom it May Concern:

As the representative of the State University of New York, College of Environmental Science and Forestry, I administrate construction contracts for work relating to our facilities and perform field inspections of the work. I have contracted with A-M Electric Inc. to provide a variety of electrical and telecommunication services on several projects here at our campus, and I am pleased to offer an extremely positive recommendation.

I have found the firm to be extremely competent in the work they have performed for us. The quality of the work is first rate, the pricing is fair and reasonable, and they have consistently delivered a quality product on schedule.

The staff is professional, knowledgeable and courteous, offering solutions and recommendations to situations that arise in the field. I have been able to count on them to inform me of issues that need to be addressed, that may have otherwise been overlooked. They have also responded quickly to my inquiries and requests for proposals, and know what it takes to get the job done right.
