

22 July 2002

To Whom It May Concern:

I am writing in regard to the performance of Sepp Herbert and A-M Electric Co. in acting as the Electrical Contractor for Phase 2 of the Rehabilitation of Baker Laboratory, located at the SUNY College of Environmental Science and Forestry in Syracuse.

Mr. Herbert and his Company were required to install a wide array of telecommunications and data infrastructure with in a very restricted site. The Electrical and telecommunications scope of work was on a very tight schedule, requiring a high degree of coordination. Sepp and his Company performed this work with a high degree of professionalism, on schedule and with out change order. The quality of A-M Electrics work is excellent, and they are a pleasure to work with.

Based upon work performed on the Baker Laboratory Project, I highly recommend Sepp Herbert and his Company, A-M Electric.

Sincerely,

Matthew Klucznik, RA  
Project Manager, QPK Design
